

## 13.0 MITIGATION MONITORING PROGRAM

Section 2.0, EXECUTIVE SUMMARY, of this EIR identifies the mitigation measures that will be implemented to reduce the impacts associated with the Foothill Parkway Westerly Extension Project. The CEQA was amended in 1989 to add Section 21081.6, which requires a public agency to adopt a monitoring and reporting program for assessing and ensuring compliance with any required mitigation measures applied to proposed development. As stated in Section 21081.6 of the Public Resources Code,

*“ . . . the public agency shall adopt a reporting or monitoring program for the changes to the project which it has adopted, or made a condition of project approval, in order to mitigate or avoid significant effects on the environment.”*

This Section 21081.6 requires a public agency to adopt a monitoring and reporting program for assessing and ensuring compliance with any required mitigation measures applied to proposed development. Section 21081.6 provides general guidelines for implementing mitigation monitoring programs and mandates that specific reporting and/or monitoring requirements, to be enforced during project implementation, shall be defined prior to final certification of the EIR.

The mitigation monitoring table below lists those mitigation measures that may be included as conditions of approval for the Project. These measures correspond to those outlined in Section 2.0 and discussed in Section 5.0, DESCRIPTION OF ENVIRONMENTAL SETTING, IMPACTS, AND MITIGATION MEASURES. To ensure that the mitigation measures are properly implemented, a monitoring program has been devised which identifies the timing and responsibility for monitoring each measure. The City of Corona Public Works Department would have the responsibility for implementing the measures, and the City of Corona Community Development Department would have the primary responsibility for monitoring and reporting the implementation of the mitigation measures.

Section 13.0 will be provided with the Final EIR.
