**Re: Foothill Parkway Westerly Extension Project**

Dear Mr. Bazmi:

Southern California Gas Company (SCG) appreciates the opportunity to review and respond to the Project's Notice of Preparation (NOP). We respectfully request that the following comments be incorporated in the subsequent Draft Environmental Impact Report (DEIR).

SCG recommends that the DEIR include a discussion of the following:

- The presence and condition of existing utility infrastructure on the project site, including right-of-ways and/or easements.
- Identification of any existing natural gas infrastructure that would need to be relocated and/or abandoned, as a result of the proposed project.
- Identification of any actions that would require permitting or acquisition of new right-of-way or easements for natural gas facilities.
- Any proposed grading and/or drainage improvements that would redirect drainage in a manner that would increase the potential for erosion around SCG facilities.

In addition, if any field monitoring for cultural or biological resources is required during construction or relocation of the natural gas facilities, the monitoring should be mentioned in the DEIR as a requirement and responsibility of the ("larger") Foothill Parkway Extension project.

Once again, we appreciate the opportunity to comment on the NOP. If you have any questions, please feel free to contact me at (909) 335-7737 or KKuennen@semprautilities.com.

Sincerely,

Kevin Kuennen  
Environmental Specialist  
Southern California Gas Company
